### Summary

Software engineer that strives to solve complex problems in an effort to make all easier to understand. As a highly motivated individual that believes two core components of innovation are challenging the status quo and collaboration, I bring high levels of energy and critical analysis to any team, so that we can create quality deliverables for stakeholders while simultaneously sharing team knowledge.

### Skills

JavaScript, React, Express, Node, Python, Django, Mocha, Mongoose, MongoDB, Heroku, Atlas, RESTful API, CSS, HTML

### Projects

**921steak** \ Demo site with full admin CRUD, used to sell other small biz on responsive upgrades \ <http://921steak.com>

- Designed Full-Stack SPA in three developer team using Django, Djoser, Python, React, and Styled Components.
- Fully responsive, includes authenticated functionality for CMS, allowing full crud of menu items to logged in users.

**Botanical Babbles** \ Social media style app for the plant community \ <https://bbfe.herokuapp.com/>

- Created Full-Stack SPA in five developer team using Express.js, Node.js, MongoDB, React.js.
- Acted as Scrum Master to ensure direction, focus, equal contribution and overall knowledge sharing.
- Established workflows, daily stand-ups, pair programming sets, and code reviews.

**JTX** \ Web app for navigating past and upcoming spaceX launch details \ <http://jtx.herokuapp.com>

- Built Front-End SPA using JavaScript, React.js, CSS and React Bootstrap.
- Implemented RESTful API for fetch calls to SpaceX launch data.
- Delivered smooth, feature rich and user friendly experience by employing responsive design elements.
- Improved user experience by linking third-party video player plug-ins, giving the app more engagement value.

**Tower of Hanoi** \ Logical brain teaser, math based video game \ <https://jtomassoni.github.io>

- Developed a game using JavaScript logic to ensure a seamless and engaging user experience.
- Utilized DOM Manipulation with CSS structure to create dynamic and easy to understand game.

### Experience
